Art. 734.
Rear Horizontal
Aluminium Ends.

IHT7000 Integrated
Head Tube 7000 series.

Sizes 115,145,175, 205mm:

The Columbus Integrated Head Tube has the major advantage of requiring only a small number of lengths to cover a wide range of frame sizes. It is made however for use with Columbus' own Headsets which require a 39.9mm sized reamer to fit (both of the above are available from ourselves). We can supply suitable Campag compatible integrated head tubes to special order. Contact us for details.
